

BIG★FISH

PROJECT FOLIO

Created by Elisa von Perger
with Alicia Chu

BIG FISH is a photographic, character- and costume-driven narrative series that explores local space, urban mythology, magical realism, and themes of escapism and loneliness, specific to one of the most isolated and vast cities in the world. It also serves as a reflection on what it means to be an emerging artist in this context.

The following images document absurd, original characters existing in various suburban settings. Some are inspired by literature or urban myth reimagined in a local context, others representative of personal experiences or reflections on the city.

Original concept, design, styling, model and editing / Elisa von Perger
